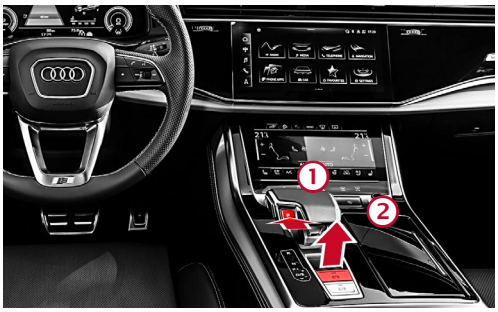
Lettering
Audi Q7 / SQ7

Q7
Lettering
(lettering can be deselected)

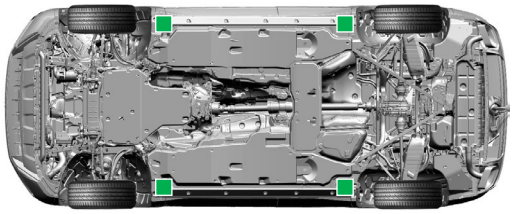
2. Immobilisation / stabilisation / lifting

Immobilising the vehicle

Press the park button “P” and set the parking brake.



Lifting points



Appropriate lifting points

3. Disable direct hazards / safety regulations

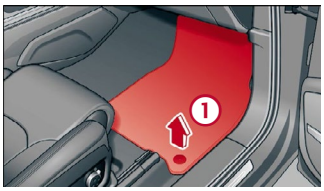
Switching off the ignition

Press the “Start-Engine-Stop” button in the centre console without operating the foot brake.

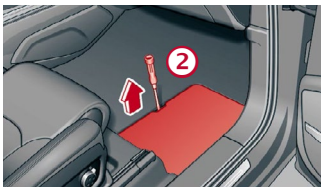
Remove vehicle key, key card and/or smartphone app so that they are more than 5 m away from the vehicle if possible.

Disconnecting the 12-volt vehicle battery

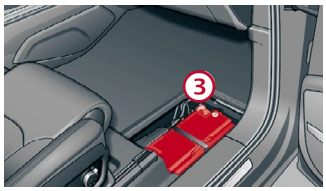
In footwell on right side of vehicle



1. Remove or lift the floor mats and/or carpet.



2. Lift off the battery compartment cover.

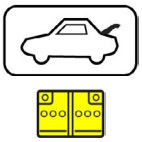


3. First disconnect the negative terminal (-) and then the positive terminal (+) of the vehicle electrical system battery.

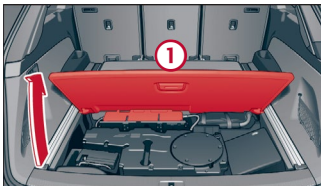
Disconnecting the 48-volt vehicle battery

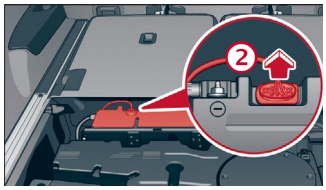
In the event of an accident in which the airbag is triggered, the 48-volt vehicle electrical system is automatically deactivated as soon as airbag triggering is detected.

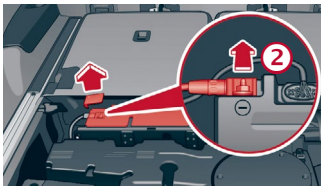
For all other cases, the 48-volt vehicle electrical system can be deactivated as follows:



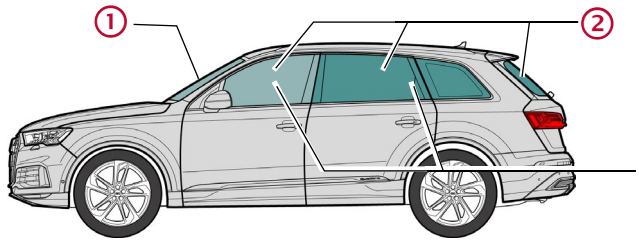
1. Remove luggage compartment floor in luggage compartment
2. Disconnect the communication connector
3. Remove left terminal cap and release negative terminal screw connection (brown/purple cable)







4. Access to the occupants



Glass types:
